

*Choosing a new dentist?*

# TOP 5 THINGS TO CONSIDER

Advice I'd give my own sister.

## REPUTATION

Look for an office with lots of great reviews. It speaks volumes when patients take the time out of their busy lives to write kind words about a practice.

## CONVENIENCE

Check out their appointment times and location. You want an office that fits your schedule. If it's convenient, you're more likely to keep a healthy oral care routine.

## FAMILY NEEDS

Find an office that fits your family's needs. It's great to be able to get the whole family seen and taken care of at one location.

## KINDNESS

A friendly and knowledgeable staff is important. Make sure to call a couple of different places and see how they respond on the phone. Can they answer your questions? Are they kind?

## EVOLVING

Technology is key to excellent dental care and it's constantly changing. It's important that the doctors and staff continue to learn and grow as well.
